Userbase	Systems/App Format	Funding(?)	Functions	Equipment/ Rec Areas
Appealing to more casual gym-goers	Would preferably be compatible with smartphones and usable through a mobile app.	How will we get the app off the ground?	Displays average wait time	All workout equipment (free weights, machines, and treadmills).
People with busy schedules.	User-friendly design–keep the app simplistic.	Possible premium accounts/perks?	The app would display the current gym population	Basketball courts
People new to the gym	Will an account be needed to access the app?	Possibility of ads on the free version of the app.	Will the app notify users of any broken machines?	Pool and outside areas

Equipment /Recreation Areas /Amenities
